Innovation: Double Click Wireless Connectors 27

Why Corning?

For more than 160 years, we have applied our unparalleled expertise in specialty glass, ceramics, and optical physics to develop products that create new industries and transform people's lives. Our products have been used in the communications networks of companies across the globe, both big and small.

There is no one more qualified to connect your network. In this guide, you'll find product information, tools, and resources to help you do the job right the first time.

Corning Optical Communications Aps

Cabelcon® RF Connector Brand

On-Site Technology and Plating Capabilities

In our Denmark facility, you'll find unsurpassed technology and plating capabilities. Our procedures and techniques, which exist to make sure you receive reliable products for every installation, include:

- RF and electrical characterisation including return and insertion loss, transfer impedance, and passive intermodulation
- Mechanical testing such as pull strength and durability
- Environmental tests from temperature cycling to corrosion and ultraviolet exposure

Additionally, we are the only connector manufacturer with Nitin-6™ plating capabilities in-house. Almost 30 years ago, we were first to use NiTiIn plating, and it has now been adopted across the industry. This plating technique offers many advantages:

- Chemical resistance
- Protection against corrosion
- Low friction surface to retain lubricants

Before

After

HFC Hardline Products

Network Nodes

- 1** Headend/primary hub (electrical-to-optical conversion)
- 2** Final node (optical-to-electrical conversion)
 - Hardline 75 Ohm connectors and jumpers
- 3** RF amplifier
 - Hardline 75 Ohm connectors and jumpers
- 4** Tap
 - Hardline 75 Ohm connectors and jumpers
- 5** Cable modem/set-top box

Applicable to Network Nodes 2, 3 and 4:

RF Type	Corning Brand	Product
2 piece HL (Brass)	True Lock	
Splitters/Taps	RF Trunk Connector with True Split Technology	
Hardline Jumper	HFX 2 Jumpers	

DOCSIS 3.1 READY. Unique connector design provides outstanding performance to 3 GHz for intermodulation, shielding, cross talk, return loss, and reliability (environmental and temperature behaviour, easy installation, low-tightening torque)

NEW: The Value of Corning RF Trunk Connector with True Split Technology

Installation and Space Savings

Future Proof Design

Exceptional Electrical Performance

Features and benefits ensure long-term performance

- Technically:
- DOCSIS 3.x ready min. 1.8 GHz ready – future upgrades covered already (no need to touch again)
 - Insulation between output ports = reduced cross talk
 - Shielding > A+++ (best in the world)
 - Full-Brass Ni/Tin-Plated housing
 - Least possible connections negatively impacting the signal
 - Splitter/tap directly connected to incoming cable (drop/trunk)
 - Water-sealed ports
 - Cabelcon® True Lock technology used (locked ferrule eliminates cable twist & max. signal protection)

Installation:

- Faster and easier installation
- Less components = less stock
- Less space needed (more space for other equipment)
- Eliminating need for bigger cabinets while upgrading
- Indoor, outdoor and underground applicable
- Round design enables easy port access/installation
- No new installation tools or training needed

New design for an exceptional electrical performance

- Reduced number of connections
- Traditional splitters/taps can not operate alone, they need both jumpers and connectors to bridge the signal
- Each jumper adds a minimum of extra connections through which the signal has to travel, thus limiting deterioration
- RF Trunk connector with True Split technology reduces the number of connections to the minimum (e.g., from five to two in a 2- to 4-way splitter) preserving the signal to improve overall system performance and reliability

4-way splitter TL525 | 13052540

Before

After

True Lock Connectors, 75 Ohm

Easier installation due to:

- Reduced tightening torque
- Connector backnut with integrated strip guide
- Special wide HEX providing space for wrenches

True Lock connector activator system

- with multigrip, endpoint centre seizing system ensures:
 - Long-term connectivity and reliability
 - Uniform grip on inner conductor
 - Reduced risk of intermodulation distortion (IMD)

Multislot ferrule enables:

- Correct pressure when tightening connector
- Reduced risk of IMD due to uniform grip on outer conductor
- Improved electrical performance
- Preventing cable from turning during installation

Technical Data	Interface Type	Splice Connector & Reducer	IEC14 Connector	3.5/12 Connector	F Connector	5/8 + PG11 Male Pin — with (MU) or without swivel nut (M)
Return Loss @ 1.0 GHz						
		< -30 dB	< -25 dB	< -35 dB	< -30 dB	< -30 dB
Return Loss @ 2.0 GHz		< -20 dB	< -25 dB	< -30 dB	< -30 dB	< -28 dB
Insertion Loss @ 1.0 GHz		< -0.10 dB	< -0.20 dB	< -0.08 dB	< -0.10 dB	< -0.10 dB
Insertion Loss @ 2.0 GHz		< -0.10 dB	< -0.20 dB	< -0.08 dB	< -0.10 dB	< -0.10 dB
Amp Rating @ 20°C Increase		21A	Female 10A/ Male 12A	Female 18A/ Male 21A	Female and Male 7A	21A
All interface types have the following technical advantages*	✓	✓	✓	✓	✓	✓

*General connector performance may change depending on cable type

All interface types have the following technical advantages:

- Uses existing tools and methods (standard strip, coring tools, and wrenches)
- Tested to 3 GHz
- Transfer impedance and shielding A++
 - Sealing IPX8 30 m water for eight hours
 - Operation/storing temperature -40 °C to +85 °C
 - Installation Temperature -5 °C to +50 °C

True Lock Hardline Connector

- True Lock Mechanism

Cabelcon® True Lock Locking System | ZA-3955

Rounded Tabs in the Locking System Design
Provide Proper Seating | ZA-3954

Cabelcon® True Lock Connector Interfaces			
Same industry-standard interfaces will be available on the True Lock range as in previous Corning connector offerings			
3.5/12M	3.5/12F	5/8M	5/8MU
FF	IEC14M	IEC14F	PG11M
			PG11MU

Features and Benefits

Reduced tightening torque	Eases installation, especially in tight or difficult installation sites
Industry's first true locked connector	Prevents cable from turning during installation
Two-piece activator system	Provides for correct pressure when tightening connector and reduces risk of IMD
Multislot ferrule	Provides uniform grip on outer conductor and improves electrical performance
Multigrip seizing mechanism	Applies uniform grip on inner conductor and reduces risk of IMD
Backwards-compatible product	No new installation tools or training required

Utilises unique Nitin-6™ plating
Extremely resistant to chemical, salt, oils, and pollutants

To order the appropriate connector for your cable, please use one of the following options:

1. Click here: www.coaxconnectors.dk/shop.asp
2. Use our online web catalogue (See page 31)
3. Contact our customer care centre (See page 31)

HFX2 jumpers, available from 0.3 m to 10 m

Features

- A++ shielding
- Available with True Lock connector option to connect with trunk cables
- One of the most flexible jumpers on the market
- Designed for installation in tight spaces
- Eight interfaces available

Benefits

- Space savings — shorter connector
- Reduced need for right-angled connectors due to space savings
- Cable flexibility ensures optimal patch management

HFX2 Jumper | CRR2319

HFX2 Jumper Family | CRR2328

Any combination of the interfaces shown are available in any jumper type and length. Please contact our customer care centre. See page 31.

Typical Specifications of HFX2 Jumpers

Product Name/Type	Product Description
5/8MU-CX/HFX2-5/8MU/0.7	93575707
Cable Minimum Bend Radius	108 mm
Frequency Range	0.3-3000 MHz
Impedance (Nominal)	75 Ohm
Amp. Rating: (measured)	12.5 A @ 10°C increase
(calculated)	17.6 A @ 20°C increase
Transfer Impedance (CoMet)	< 0.9 m Ohm/m @ 5-30 MHz < 0.6 m Ohm/Item @ 5-30 MHz
Screening Attenuation (CoMet)	Class A++ > 110 dB @ 30-1000 MHz > 95 dB @ 1000-2000 MHz > 85 dB @ 2000-3000 MHz
Return Loss (IEC 61169-1)	Typical
0.3-500 MHz	-28.6 dB
500-860 MHz	-28.4 dB
860-1000 MHz	-27.1 dB
Temperatures	
Installation:	5°C to +50°C
Operation:	-40°C to IPX8
Storage:	-40°C to IPX8
Sealing Test	
(IEC IP-code)	1 m/24 hours +70°C
O-ring	EPDM
Base Material	

Interfaces Available		
3.5/12M	3.5/12F	5/8MU
5/8F	PG11MU	FM
		90-5/8MU
		IEC14M

HFC Drop Products

Network Nodes

- 1** Headend/primary hub (electrical-to-optical conversion)
- 2** Final node (optical-to-electrical conversion)
- 3** RF amplifier
 - Drop 75 Ohm connectors and jumpers
- 4** Tap
 - Drop 75 Ohm connectors and jumpers
- 5** Cable modem/set-top box

Applicable to Network Nodes 4 and 5:

RF Type	Corning Brand	Product
CX3™ Standard Compression	CX3 (Indoor and Outdoor)	
Compression	QuickMount™ (Indoor and Outdoor)	
Toolless	Self-Install Auto Compression (Indoor and Outdoor)	
Splitters/Taps	RF Trunk Connector with True Split Technology	
Drop Jumpers	CXI	

DOCSIS 3.1 READY. Unique connector design provides outstanding performance to 3 GHz for intermodulation, shielding, cross talk return loss, and reliability (environmental and temperature behavior, easy installation).

Hybrid QuickMount™ : 360° Compression With Additional Braid Gripper

Reliability

Jacket deterioration minimised by braid gripper

- Compression results in the cable jacket pressed between outer metal body and dielectric of the cable (first point of compression)
- **Additional gripper** – grips braid between two brass (metal) parts in the front of the connector (creating contact for signal) transmission and ensuring pull strength)

Easier and Fast Installation

Traditional Installation: QuickMount Installation:

Step 1	Step 1
Strip the cable	Strip the cable
Step 2	Step 2
Pull back braid	Push on connector (without force)
Step 3	Step 3
Push on connector	Compress

Superior Electrical Performance

Future upgrades covered by superior electrical performance

Return Loss (IEC 61169-1)	Better Than	Typical
0.3-500 MHz	-36.6 dB	-37.1 dB
500-860 MHz	-34.2 dB	-36.7 dB
860-1000 MHz	-34.2 dB	-36.7 dB
1000-1750 MHz	-32.0 dB	-35.1 dB
1750-2150 MHz	-30.0 dB	-34.5 dB
2150-3000 MHz	-25 dB	-29.3 dB

Hybrid QuickMount

Cabelcon® QuickMount™ drop connectors have been tested up to 3 GHz ensuring an optimum performance no matter what frequency ranges new releases of DOCSIS adopt in the future.

Drop Connectors, 75 Ohm

- Integrated seals enable safe outdoor use
- Nitin-6™ plating provides resistance to environmental influences
- One-piece connector with no loose parts makes installation easy
- Uses one all-size tool to compress all interfaces (F, IEC, BNC) across all standard cable sizes (from Mini to RG11)
- Tensile strength exceeds cable specifications
- Successfully tested to 3 GHz

99909403-02

Fully Inserted and Compressed

Functions of our innovative PushPin™ system:

- The pin is protected in the body during transport and is automatically pushed in place during cable installation (before compression)
- Eliminates blind entry when installing, offering visible indication of properly installed cable

PushPin technology is available in all CX3™ RG7/11 connectors, CX3 mini connectors, and in some RG6/59 connector types. BNC and RCA connectors also feature the unique system.

Drop Connectors for RG59 Cables

Product Name	Part Number	Product Description
F Male Self-Install RG59		
F-59 Self-Install 3.7 NI	99909616	For MINI/RG59 5.0 mm cable, with 3.5 mm dielectric

CX3™ RG11 F-Connector

Position one:
The pin grips the inner conductor and makes sure that the cable is always inserted correctly in the connector.

Position two:
The pin locks the inner conductor as the cable is inserted while the pin is pushed forward in place - indicating that the cable is correctly installed.

The shown example is our CX3 RG11 F—connector but the principle is the same for our other CX3 types.

Functions of our innovative PushPin system:

- The pin is protected in the body during transport (except CX3 5/8M) and is automatically pushed in place during cable installation (before compression)
- Eliminates blind entry when installing, offering visible indication of properly installed cable

PushPin technology is available in all CX3 RG7/11 connectors, CX3 mini connectors, and in some RG6/59 connector types. BNC and RCA connectors also feature the unique system.

Drop Compression Tools and Stripper

Product Type/Name	Part Number	Product Description
Compression Tools		
Compression Tool MINI/RG59/6	98029075	Compression Tool IEC/F/BNC/SHORT
CX3* Pocket Tool 59/6 F and IEC	98029070	Compression Tool IEC/F
Compression Tool CX3 RG59/6 WB	98029046	Wall Box Compression Tool (if limited space is available, no rotating head)

FM-CXJA+6-FM/CX3/B/0.6	94980376	Jumper, F to F, 7.0 mm cable, 0.6 m
FM-CXJA+6-FM/CX3/B/0.8	94980378	Jumper, F to F, 7.0 mm cable, 0.8 m

Any length – from 0.2 m to 15+ m – and combination of cables and connectors are available upon request. White and black cable is available in A and A+ types (A++ upon request).

Available interfaces include standard F, F SC, IEC male and female, and 3.5/12 male and female.

- 1 Satellite Dish
- 2 Satellite Receiver
- 3 Splitter
- 4 Television

Self-Install Auto-Compression Connector

- A++ shielding
- Auto-compression with support sleeve prevents cable loosening
- Finger-friendly nut (optimal tap installation)
- Full sealing (front and back)
- > 35 kg pull strength
- Cable prep guide
- No compression tool needed
- DIY installation set available

Double Click Wireless Connectors

The 50 Ohm wireless double-click connector provides easy cable preparation and connector installation.

Available for use with various standard cables using standard interfaces, the connector features a two-piece design that eliminates the loose parts that can be dropped or lost during field installation.

The tooling dramatically cuts the time required to prepare cable and the POM ferrule design eliminates the need to hammer a backnut onto the cable.

Tightening torque is significantly less than other industry offerings with less turns required to fully tighten the connector. The double-click connector features brass bodies with Nitin-6™ plating and silver-plated centre conductors.

- 1 Base Band Unit
- 2 Remote Radio Head
 - Wireless 50 Ohm connectors
- 3 Antenna
 - Wireless 50 Ohm connectors

Interfaces Available		
7/16	4-1/9.5 (mini DIN)	4-3/10 N
5/8F	PG11MU	FM IEC14M

Connectors are available for the following cable sizes:		
1/2 in	7/8 in	1 1/4 in
		1 5/8 in

Parameter	Measurement Conditions	Typical Measurement 1 5/8 in	Typical Measurement 1 5/8 in, new design (double click)	Difference
VSWR (Return Loss)	50-1000 Mhz	38 dB	46 dB	+8 dB
	1000-2000 Mhz	35 dB	41 dB	+6 dB
	2000-3000 Mhz	34 dB	39 dB	+5 dB
Intermodulation	2 x 20 W	150 dBc	168 dBc	+18 dB

The Value of Double Click Wireless Connectors

Easier and Faster Installation

Superior Electrical Performance

Intelligent Design

Easier and Faster Installation

- 90 secs. installation time vs. > five min. of traditional connectors

Superior Electrical Performance

- Return loss (VSWR): 5-8 dB improvement vs. available solutions
- Intermodulation (PIM): 18 dB improvement vs. available solutions

Intelligent Design

- High-tech polymer ferrule: 360° seal at the cable jacket
- Double click technology: Dual Grip on outer conductor, allows a more stable connection for the best PIM performance
- “Super-sealing” interface: creates a water tight interface with special polymer eliminating O-rings
- Best-in-class EPDM O-ring: O-ring provides sealing in case of cable jacket damage

Full NiTiIn-plated Brass Body

Nitin-6™ plating adds on excellent corrosion resistance and long-term conductivity and reliability to the nut, brass gripper, and body of the connector.

This in-house nonmagnetic plating enables:

- Excellent protection in all environments against corrosion
- Low-friction surface that retains lubricant but resists finger markings
- No toxicity and no allergic reactions to individuals allergic to nickel
