Double-shielded Class A coaxial cable

The structure of these coaxial cables with a high-coverage aluminium braid, together with an overlapped foil made of aluminium and polyester, provides double-layer of shielding. These structural properties allow achieving the outstanding levels of shielding attenuation (SA) defined by Class A:

- For 30 MHz - 1000 MHz => SA > 85 dB
- For 1000 MHz - 2000 MHz => SA > 75 dB
- For 2000 MHz - 3000 MHz => SA > 65 dB
